Dear Hiring Manager,

I am writing to express my interest in the AI Engineering Internship opportunity within your R&D AI Engineering team. I am currently completing my Diploma in Software Engineering at SLIIT City Uni and plan to continue my degree pathway with the University of Bedfordshire.

As an enthusiastic and motivated undergraduate student, I am eager to gain industry experience in Artificial Intelligence, Machine Learning, and Software Engineering while contributing to innovative AI-driven solutions.

I have a strong interest in AI-powered application development and full stack software engineering. Through my academic and personal projects, I have gained hands-on experience with Python, React Native, Node.js, Express.js, MongoDB, and AI technologies including ChatGPT API, Hugging Face Transformers, and Google Vision API.

I have also worked on AI-integrated systems involving semantic search, NLP-based processing, and intelligent automation workflows.

One of my key projects is the Ambience Studio Management System, a full stack web application currently in development for Ambience Studio, a leading photography studio based in Colombo, Sri Lanka. The system is being developed using Node.js, Express.js, MongoDB, and Bootstrap, featuring booking management, customer handling, authentication, and admin dashboard functionalities.

I have also developed full stack platforms including real-time communication applications and AI-powered web platforms, which strengthened my skills in backend development, API integration, problem solving, and collaborative software development practices.

In addition, I participated in the IEEE Xtreme Programming Competition and volunteered at the IEEE Electroverse Technical Robotics Workshop, where I further developed my teamwork, adaptability, and technical collaboration skills in fast-paced environments.

I am highly eager to learn from experienced engineers and data scientists, contribute to AI experimentation and development, and continuously improve my technical knowledge in machine learning and data science. I believe my passion for AI, strong willingness to learn, and hands-on development experience make me a strong candidate for this internship opportunity.

Sincerely,
Thiviyath Maheswaran
